Helping to keep customer and personal information confidential whilst driving compliance, mitigating risks and controlling costs.

Simply Automated

Automate common tasks to reduce time, errors and improve operational efficiency growing profit and improve customer experience.

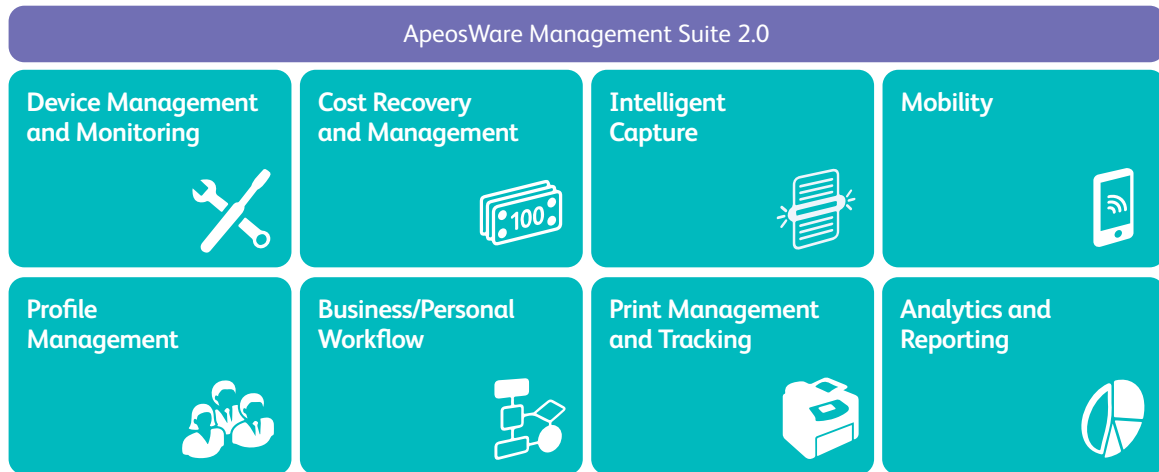

Simply Connected

Seamlessly connect systems with people to simplify customer interactions and collaboration establishing new levels of organisational agility.

A complete suite of business solutions

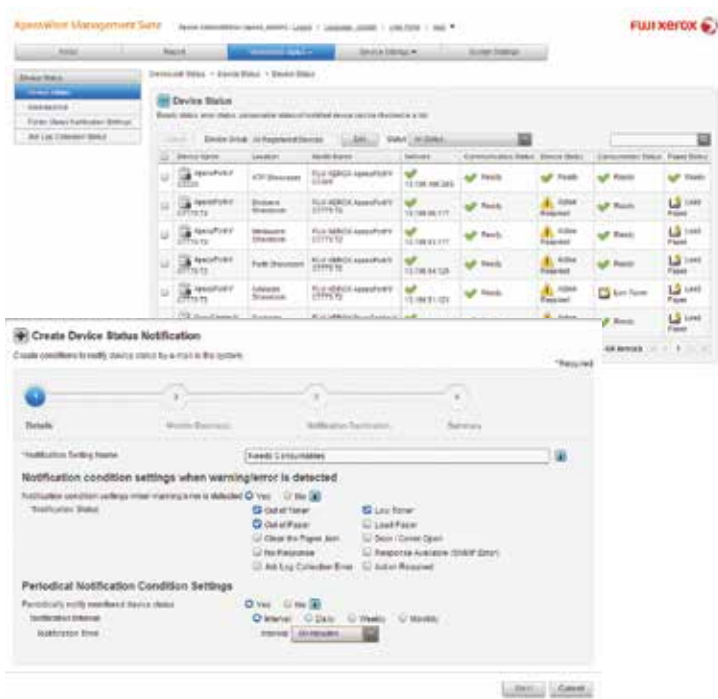

ApeosWare Management Suite 2.0 provides your business with a robust toolset tailored specifically to help you improve how you optimise customer experiences and manage your operational costs.

Device Management and Monitoring

ApeosWare Management Suite 2.0, streamlines administration and optimises the end-user experience with real-time centralised management and monitoring of all network devices.

Monitoring devices displays current status, meter information through a web-browser for ease-of-use and alerts can be configured to automatically notify you if an error occurs.

Cost Recovery and Management

ApeosWare Management Suite 2.0 delivers extensive cost recovery and management to charge for copy, print, scan and fax by tracking the quantities physically output at the device and assigned the associated pricing policy. Multiple price lines can be assigning based upon your unique billing needs.

Enforcing Zero-Stop and setting account quotas and discount schedules allows your organisation to comprehensively manage your operational costs.

Administrators can easily categorise and tally the costs by department, faculty, right down to the individual, generating ad-hoc or customised scheduled billing statements to improve operational efficiencies.

Organisational budgets can be set and pre-assigned, and accounts can be easily topped-up with integration with external payment gateways, such as PayPal and Commonwealth Bank.

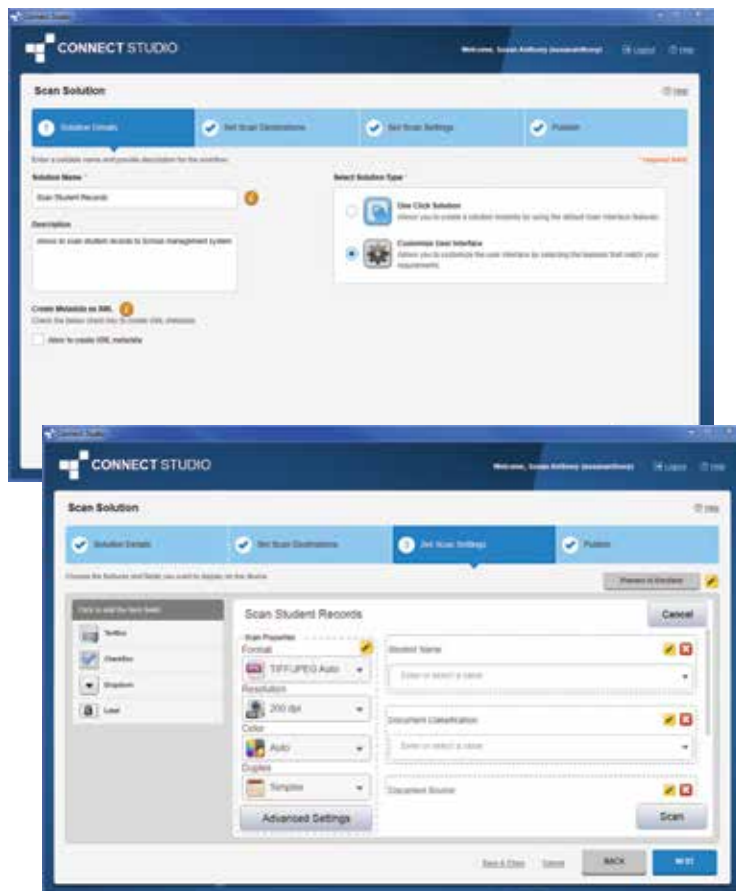

Intelligent Capture

Use the scanning capabilities of your Fuji Xerox multifunctional device to easily digitise paper documents.

ApeosWare Management Suite 2.0 processes, delivers, outputs and stores documents automatically, plus with powerful optical-character recognition (OCR) these paper documents can be converted to searchable digital versions effortlessly.

Scanned documents can be sent to email, stored in shared folders on the network, sent to Cloud storage such as Fuji Xerox Working Folder or to content management system such as DocuShare, Sharepoint, Trim and Objective.

Mobility

ApeosWare Management Suite 2.0 is designed for mobile use. It is simple for you to print and scan documents from favourite mobile devices including Apple iOS and Android.

The ApeosWare Management Suite 2.0 mobile client also enables your business to upload documents to content management systems such as Sharepoint, DocuShare and Trim or upload to cloud services like Salesforce and Fuji Xerox Working Folder.

Profile Management

ApeosWare Management Suite 2.0 optimises administration with powerful device, user and group policies. Administrators can easily register and manage who uses the device, how they use it and what it costs. User management is simple with integration to active directory for importing user and group information.

Business and Personal Workflow

ApeosWare Management Suite 2.0 enables you to integrate into your organisations line-of-business systems, automating common tasks and improving operational efficiencies. Each workflow can be customised from the icon on the control-panel of Fuji Xerox multi-functional device through to capturing necessary meta-data. ApeosWare Management Suite 2.0 can also seamlessly integrate with enterprise business process solutions like Kofax, Intelledox and DocuShare.

Print Management and Tracking

Manage, track and audit your entire print environment simply with ApeosWare Management Suite 2.0. Administrators can easily deploy a range of printing environments including; OnDemand, Web and Guest Printing. Through customisable print-rules and print quotas your organisation can manage and control costs whilst ensuring sustainability targets are achieved.

Guest Print

1 Send a print data to ApeosWare Management Suite 2.0 by email or webUI and receive a token from ApeosWare Management Suite 2.0 server.

2 Pay for the print job at a reception (optional)

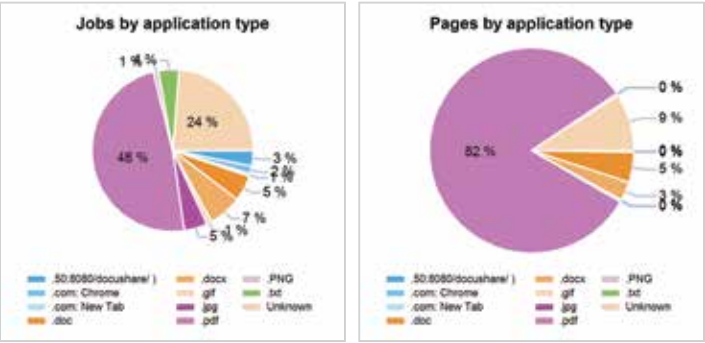

3 Print by inputting the token

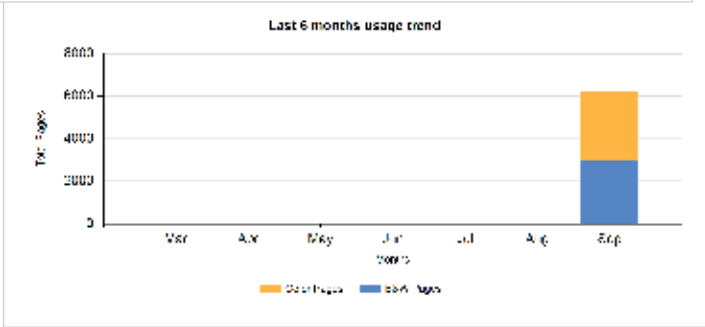

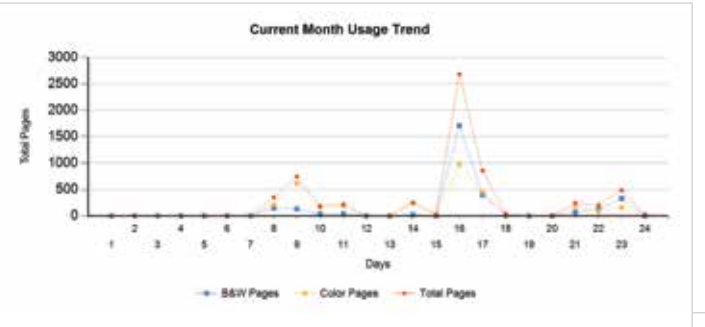

Analytics and Reporting

ApeosWare Management Suite 2.0 is built upon an industry standard reporting engine and comes with over 35 pre-defined one-click reports. Administrators can additionally create and schedule graphical reports by user and device to show power, paper consumption and detailed analysis reports, to further optimise business workflows.

System Summary		Current Month Usage Summary	
Number of users	18	Total number of pages	6275
Number of devices	6	Total number of jobs	441
